

Zinc Ribbon Packing & Spool Specification

Reference packing information for zinc ribbon anode export supply.

Item	Details
Handling	Confirm unloading, storage, and installation conditions before shipment
Quotation Inputs	Ribbon size, total length, spool preference, packaging restriction, destination port
Notice	Final packing design depends on product size and order quantity

Packing Options

Spool, coil, wooden case, pallet

Labeling

Product name, size, quantity, batch reference, gross/net weight

Export Packing

Moisture protection and seaworthy packing by order

Documents

Packing list, commercial invoice, material information by request

Customization

Spool dimensions and gross weight can be adjusted by order

Documents Available on Request

Product datasheet, material information, inspection report, certificate of analysis, packing list, commercial invoice, and other agreed project documents can be discussed before order confirmation.

Important Notice

Cathodic protection product selection should be confirmed according to project conditions, including resistivity, coating condition, current demand, design life, installation environment, and applicable project standards.

Quotation Inputs

Product type, size, alloy, quantity, application, destination port, required standard, packaging requirement, and documentation requirement.

This document is for preliminary procurement review. Final specification, inspection scope, packaging, and delivery terms should be confirmed in the quotation and purchase order.
